Daikin GL (60 Hz)
Up to 18 SEER

Everyday comfort

Nothing compares to creating that ideal family space that makes you feel at home year-round. That's why the GL's smart cooling system design integrates eco-friendly refrigerants, inverter technology and contemporary beauty so your personal space can always be an oasis of tranquility and calm.

Timer
Programs the unit to turn on or off after a specified period of time.

Turbo
Enjoy increased airflow and faster cooling.

Lock
Locks the remote control functions to prevent children from changing the settings.

Relax comfortably

The temperature during the night does not remain the same. The GL sleep mode gently increases the temperature automatically to maintain a comfortable room temperature and save energy.

Intelligent pre-heating

When using the heating mode, the GL system monitors the discharge air temperature to avoid blowing uncomfortably cold air into the room.

Breathe easier

Common allergy triggers such as dust mites and mold thrive in an excessively humid environment. The GL Series has dehumidification capability that removes moisture from the cooling area. You will feel comfort due to the reduced humidity while enjoying the benefits of temperature control.
